**Faculty of Science and Technology (FST)**

**Department of Computer Science (CS)**

**Course: Web Technologies**

**Lab Task 01: Restaurant Website**

**Instruction:**

- 1. Complete the task**
- 2. After completion, push the code in the GitHub repository.**

**Scenario:**

You've been hired by "Tasty Bites Restaurant" to create their first website. They need an online presence to showcase their menu and attract customers.

**Steps:**

1. Create a new folder called restaurant-website
2. Create index.html as the main page
3. **Design a homepage with:**
  - a. Restaurant name and logo area
  - b. Navigation menu (Home, Menu, About, Contact)
  - c. Welcome section with restaurant description
  - d. Featured dishes section with images and descriptions
  - e. Location and hours information
4. **Create a separate menu.html page with:**
  - a. Appetizers, main courses, and desserts in separate sections
  - b. Use tables to show items and prices
5. Add a contact form on the contact section
